       aeroplanes would be required to accommodate 180 passengers?

(6)   In a forest, there are 6 trees.
       How many such forests will combinedly have 42 trees?

(7)   A class has 18 students. If each student has 5 notebooks,
       how many number of notebooks are there in total?

MATHS WORKSHEETS FOR CLASS 3
WORD PROBLEMS

CORRECT ANSWERS

(1) **Cricket balls they have in total**

: 7 x 4 = 28 cricket balls

(2) **Cupcakes he can put in each box**

: 27 ÷ 3 = 9 cupcakes in each box

(3) **The total number of workers in the post offices**

: 4 x 10 = 40 workers

(4) **The number of slices they need to order**

: 5 x 4 = 20 slices

(5) **Number of such aeroplanes required**

: 180 ÷ 60 = 3 aeroplanes

(6) **Number of forests**

: 42 ÷ 6 = 7 forests

(7) **The number of notebooks in total**

: 18 x 5 = 90 notebooks
